How to Dub an Audio Cassette Tape

Copying an Entire Tape
- Insert the master cassette into deck A and a blank cassette into deck B.
- If dubbing both sides of the master, set the Direction Mode Switch to the center position. If dubbing only a single side, set the switch to the left position.
- Set the dubbing speed using the Dubbing Speed Selector. Keep in mind that high-speed dubbing reduces the sound quality of the copy.
- Use the Tape Direction Switches to set the side of the blank cassette on which to record. “▼” indicates the front side of the tape.
- Press the pause button, located in the Record Controls, to begin the dub.

Dubbing a Specific Portion of a Cassette Tape
- Proceed with all but the last step outlined above.
- Press deck A’s stop button.
- Queue the cassette to the beginning of the segment you would like to copy.
- Press PAUSE on Deck A.
